

How to Print Your Own Private Copy of *Street Hawk: Resurrection Protocol*

These instructions are for printing your own private personal copy of *Street Hawk: Resurrection Protocol* using the enclosed print-ready files.

This is an unofficial, non-commercial fan-fiction project. The files are provided only so fans may create a private copy for themselves. **Please do not** list, sell, distribute, or make the book publicly available through Lulu or any other print service.

Files included

You should have two PDF files:

Interior file:

Street_Hawk_Resurrection_Protocol_Interior.pdf

Cover file:

Street_Hawk_Resurrection_Protocol_Cover.pdf

The interior file contains the book pages. The cover file contains the full wraparound cover: back cover, spine, and front cover.

Printing through Lulu

Go to **Lulu.com** and create or sign into your account.

Once signed in, begin a new print book project.

Depending on Lulu's current layout, this may appear as:

Create → Print Book

or

Start a Project → Print Book

Choose **Paperback**.

When asked for the book title, enter:

Street Hawk: Resurrection Protocol

For the author name, enter:

Lee Tyers

When asked what you want to do with the project, choose the private/personal option.

This may be worded as:

Keep it private

Private access

Print for personal use or similar.

Do **not** choose public distribution or global distribution.

Book settings

When Lulu asks you to choose your book options, use the following settings:

Option	Choose
Book type	Paperback
Trim size	U.S. Trade 6" × 9"
Interior colour	Black & White
Paper	Standard
Binding	Perfect Bound
Cover	Full Colour
Cover finish	Matte, unless you prefer gloss

Distribution/access Private / Personal use only

If Lulu offers cream or white paper, either should work. Cream may feel slightly more novel-like, while white may give the images and text a crisper look.

Upload the interior PDF

When prompted to upload your manuscript or interior file, upload:

Street_Hawk_Resurrection_Protocol_Interior.pdf

Lulu may check the file and show warnings about transparency or bleed. If the preview looks correct and all pages appear as expected, you should be able to continue.

The book should show as approximately:

272 pages

If Lulu shows a different page count, stop and check that you uploaded the correct file.

Upload the cover PDF

After the interior file has been accepted and Lulu moves you to the cover step, choose the option to upload your own full cover file.

Upload:

Street_Hawk_Resurrection_Protocol_Cover.pdf

This is already sized for the 6" × 9" paperback with the correct spine width for the supplied interior file.

Do not use Lulu's cover creator unless you are deliberately making your own cover.

Preview carefully

Before ordering, use Lulu's online preview to check:

- The front cover appears correctly.
- The spine text is visible and reasonably centred.
- The back cover text is readable.
- No template lines or guide marks are visible.
- The title page appears correctly.
- The copyright/disclaimer page appears correctly.
- Chapter headings and page numbers look normal.
- The project is still set to private/personal use only.

Small shifts in spine alignment can happen during print production, so a tiny amount of movement is normal.

Order your copy

Once everything looks correct, continue to checkout and order your personal copy.

Please remember: this print setup is intended only for private personal fan copies. Do not make the project public, enable distribution, sell copies, or upload the files elsewhere.

Enjoy the ride.
